ICT Undergraduate(SUSS) | Cybersecurity&DataAnalysis | Python | ITIL4Certified

EDUCATION

Singapore University of Social Sciences

Aug 2025 – Jan 2029 (Expected)

Bachelor of Information and Communication Technology | GPA: 4.45/5.00

- Relevant coursework: Data Structures, Cybersecurity Fundamentals, Programming with Python, Networking

Temasek Polytechnic

Apr 2020 – Apr 2023

Diploma in Cybersecurity and Digital Forensics

- Class Representative (2021 & 2023); member of the IIT Subcommittee

WORK EXPERIENCE

DHL Supply Chain

Jun 2022 – Feb 2023

Cybersecurity Analyst Intern | Singapore

- Assisted the CISO in conducting end-to-end risk assessments for new applications entering the company's ecosystem across the APAC region
- Identified and documented application vulnerabilities using Qualys and LeanIX; liaised directly with product owners to track remediation efforts
- Ensured all onboarded applications met DHL's security baseline, reducing the risk of exploitation before go-live

The Logic Coders

Nov 2025 – Present

Student Tutor (Python & Robotics) | Singapore

- Delivered Python programming lessons to students of varying skill levels, strengthening their coding fundamentals
- Taught robotics using Lego EV3 to and various block based language such as CodeMonkey, MakeCode
- Coached students for Competitions such as Hwa Chong Information-Communication Challenge, CodeFest

MathVision

Jul 2025 – Nov 2025

Student Tutor (Mathematics) | Singapore

- Tutored students from Grades 1–8 in Mathematics and lower-grade Olympiad Math, adapting lessons to individual learning styles

PROJECTS

Password Analyzer

2025

Personal Project | Python | github.com/KianSiangAng/password-analyzer

- Built a Python terminal tool that evaluates password security through entropy calculation, complexity checks, and common password detection against a local wordlist
- Integrated the Have I Been Pwned (HIBP) API using k-anonymity to check passwords against known data breach databases without exposing the full password
- Implemented an intuitive 0–100 risk scoring system with colour-coded output and actionable improvement suggestions for weak passwords
- Packaged with a one-command setup script managing all dependencies (colorama, requests, tabulate), making it easy for non-technical users to run
- Intentionally distributed as a local CLI tool rather than a web app to eliminate the risk of password transmission over the network — a deliberate threat modelling decision

SUSS Calendar Exporter

2025

Personal Project | HTML / JavaScript | github.com/KianSiangAng/suss-calendar-exporter

- Identified a gap in SUSS e-services where course timetables could not be exported directly to calendar apps (Google Calendar, Apple Calendar, etc.)

- Built a browser-based tool using HTML and JavaScript that parses pasted timetable data and generates a downloadable .ics file, importable into any calendar application
- Added support for single-module export, allowing users to specify module and course codes for targeted exports
- Deployed as a standalone web tool; actively used by SUSS students to manage their academic schedules

SKILLS & CERTIFICATIONS

Technical Skills: Python, SQL (basic), Qualys, LeanIX, REST APIs, iCal/ICS, Cybersecurity Risk Assessment, Password Security Analysis, Data Analysis

Certifications: ITIL 4 Foundation (2025), Introduction to Generative AI Learning Path Specialization (2024)

Soft Skills: Communication, stakeholder management, analytical thinking, adaptability

ACHIEVEMENTS

- Colours Award – 1st individual placing at NSG Taekwondo Championship (2018)
